DELIVERY AND ASSESSMENT	<p>DELIVERY MODE: The unit is delivered face to face in a classroom environment</p>															

**DELIVERY AND
ASSESSMENT
CONTINUED**

DURATION AND ENDORSEMENT:

The unit is delivered over three days in a classroom environment. Learning commences four weeks prior to the delivery of face-to-face training and continues in the learner's own time both during and after face to face training.

SESSIONS:

Learners will cover a broad number of subjects in women's sexual health, including, but not limited to:

Anatomy and Physiology, Reproductive and Sexual Health overview, Health Promotion, Pregnancy Options, Pre-Conception Care, Contraception, Cervical Screening, Sexual Violence, Domestic & Family violence, Sexual History Taking, Sexually Transmitted Infections, Blood Borne Viruses, Pelvic Floor Health, Breast Health, Women's Business and Culturally Congruent Communication.

A pack containing a timetable will be issued to learners on day one of face-to-face training. The timetable is sequenced carefully, according to unit assessment and competency requirements. The timetable is subject to change, depending on the availability of presenters.

Cervical Screening (CST) Training is offered over two days in addition to the unit and is elective for all learners. This additional training is offered opportunistically, as many learners travel from rural and remote communities for the unit, and would otherwise, not have the opportunity to engage in such training.

Those undertaking CST training must be required to provide cervical screening as part of their employment in order to complete assessment and maintain skills. The learner's workplace must agree to provide sufficient and reasonable access to support the learner to complete clinical training, as the majority of the assessment will be carried out in the learner's workplace.

Implanon NXT insertion simulation training is also offered as part of the course. This additional clinical training can only be undertaken subsequent to completion of the associated online theory module.

ORGANISATION:

Learners are emailed four weeks prior to face-to-face training and are provided with the following:

- Student Introduction letter / FPWNT map
- USI information
- HLTASXH002 assessment requirements & Unit of competency
- Pre disposing activity – (assessment one)
- Resource materials to support pre disposing activity and suggested additional pre reading

ASSESSMENT:

A combination of assessment methods will be utilised to determine the learner's competency in the unit. These include oral and written methods, observation, simulation, structured activities, third-party feedback, role play, and a work-based assessment.

	<p>Learners are issued with a unit workbook on day one. This workbook must be completed and submitted within six weeks of the final day of face-to-face training.</p> <p>The assessment process, benchmarks and outcomes, timeframes and submission, resources and support, rights and responsibilities, and disciplinary procedures are clearly outlined in the front of the unit workbook.</p> <p>Learners are responsible for seeking clarification from the facilitator should they need further information regarding assessment. All learners must sign the participant declaration located in the front page of the unit workbook prior to commencing the workbook.</p> <p><u>EVIDENCE-GATHERING TECHNIQUES:</u></p> <p>FPWNT will offer alternative methods of assessment to learners with <u>special needs</u>, subject to discussion and mutual agreement on what is required, on an individual basis.</p> <p><u>EXPECTATIONS:</u></p> <p>Learners are required to attend the full three days of the theory workshop and sign in on the morning of each day. Should a participant need to leave early, arrive late or leave the workshop for any period of time, this will need to be discussed with the facilitator and an alternative solution must be formalised.</p> <p>Learners are expected to complete <u>all</u> assessment to a satisfactory standard in order to gain a 'statement of attainment' for the unit.</p> <p>All expectations including house rules, occupational health and safety requirements, unit information and assessment requirements will be explained in detail during the first session of face-to-face learning.</p> <p>Throughout the duration of training, learners are expected to abide by FPWNT policy and procedure as outlined in the participant information handbook.</p>
